

PHOENIX ORGANS

Welcome to the Phoenix Organs UK Web-site

Everything about a Phoenix Organ makes it authentic to its pipe organ counterpart. Our system has been designed from the "ground up", with no technical pre-conceptions, and is the most flexible on the market today. Our goal is to build for you the best possible musical instrument that will meet your particular needs. Our system can provide whatever tonal palate you wish, be it Baroque, Romantic, French, English, American or your own eclectic choice. Our designers can assist you in ensuring that the instrument has musical integrity and meets your musical requirements. Staff at Phoenix Organs have extensive experience of designing organs for both liturgical and concert use.

Old-world craftsmanship and the highest standards of excellence characterise the design and construction of our consoles. The electronic elements of our organs are built to the highest standards and fully tested before shipping; we use standard electronic components to ensure their on-going availability. The sounds emanating from a Phoenix Organ, along with the look and feel of the console, will convince you that you are playing a truly fine pipe organ, one that you will enjoy playing over and over again.

We believe that our instruments are the best substitute for the real thing.

What some of our customers have said about Phoenix Organs

"For some time I had been exploring the different options available for an organ for private practice. Only when I heard the Phoenix system did I contemplate a digital organ for my house; the extraordinary realism together with the very comfortable and superbly finished consoles make Phoenix unequalled by any other digital organ system. In addition, the style of organ and specification are

completely at the choice of the client; this, together with the highly-sophisticated voicing software, means that there is never a feeling of having to live with something which is not exactly as one wants it. I am delighted with the very beautiful tonal results Phoenix has achieved."

Robert Sharpe (Director of Music, Truro Cathedral)

Explore this site to find out why and order the CD to hear for yourself. We can arrange demonstrations so that you can try out our organs yourself. [Contact your nearest agent](#) or contact us directly.

To help you appreciate the excellent value our organs offer, we have prepared "baseline" organ specifications for two Phoenix Organs (a [two manual and pedal organ](#) and a [three manual and pedal organ](#)). Please contact us to [ask for the current prices of these instrument](#) (without obligation) - we promise you will be pleasantly surprised. The [recent installation section](#) of the web-site provides comprehensive details of some of the instruments we have recently installed.

To receive a copy of our CD demonstrating the beautiful sounds of a Phoenix Organ then click on the CD icon. (Please remember to include your full postal address).

Recent News (March 2005)

Some recent orders

St Urban's Church Leeds has ordered a two manual and pedal draw stop organ for delivery in March.

St. Columba's Anfield (Liverpool) has ordered a three manual and pedal organ for installation in March/April 2005. The [specification](#) is now available.

St John the Baptist Broughton (near Preston) has ordered a large [four manual \(and pedal\) organ](#) with 112 draw-stops and 24 sound channels for delivery in April 2005.

Some recent installations

Leeds Cathedral The new [four manual Phoenix Organ](#) was installed at the end of February 2005. The fourth manual is an Echo/Bombard division rather than the more usual Solo Organ.

We installed a new three manual and pedal organ in **St Paul's Skelmersdale** (Lancashire) at the end of February. The [specification](#) is on-line.

In December we installed an [interesting three manual](#) and pedal **residence organ** with English, French and German specifications.

Robert Sharpe (Director of Music at Truro Cathedral) has recently taken delivery of a [three manual \(and pedal\) organ](#) with 47 speaking stops voiced in the style of Aristide Cavallé-Coll.

Last summer we installed a [three manual \(and pedal\) draw-stop organ](#) in the

Padiham Unitarian Chapel in Burnley, Lancashire.

A [two manual \(and pedal\) organ](#) with "continental" / baroque voicing has been installed in **The Old Church, Penallt, Monmouthshire, Wales.** Details of the [design concept](#) of this instrument are now included.

"The Phoenix organ at Penallt has exceeded all expectations, not just in the realism of its sound but in the variety and authenticity of its colours. It demonstrates persuasively that given high quality samples, amplification and digital design systems the physical limitations suggested by a traditional pipe organ can be left behind whilst maintaining the aural illusion of a fine pipe instrument."

David R Murray (Penallt Church Organist)
